30%
less
energy use
than AC fans

Safe, efficient heating
optimised for peak and
off-peak use.

GUARDIAN EC™ AIR CURTAINS

Delivering doorway climate control powered by a new electronically commutated (EC) fan, in line with the latest European Ecodesign criteria. Experience up to 30% lower power consumption compared to traditional AC fans.

The surface-mounted air curtain is made from recyclable materials and features a sleek RAL 9006 finish, supporting sustainability goals while delivering a modern, visually appealing design.

Features & Benefits

- ✓ Airflow: 2,000–4,800 m³/hr
- ✓ WiFi touch screen & smart phone app
- ✓ Quiet, lightweight, low maintenance
- ✓ Simple installation
- ✓ Alternative to gas technology

Applications

- Retail spaces
- Car showrooms & service stations
- Sports halls
- Exhibition halls

AIR CURTAIN RANGE

Seal the comfort, save the energy. Optimise thermal control with our range of Air Curtains, suitable for industrial and commercial spaces.

AB INDUSTRIAL

popular in warehouses,
hangars and other
large spaces

AC MINI

for retail premises on
smaller doors (up to a
maximum opening of 1m)

ACT

recessed/surface
mounted ceiling
heaters

ACR MINI

installed within a suspended
ceiling/bulkhead above
small openings

Benefits of Choosing REZNOR® Air Curtains

- ✓ **Save energy** - reduces heat loss and lowers heating costs
- ✓ **Cleaner air** - keeps out dust, insects, and outdoor pollutants
- ✓ **Comfortable environment** - provides a steady, warm airflow
- ✓ **Seamless installation** - fits neatly in ceilings or doorways.

ELECTRIC WARM AIR HEATERS

The e+ is a cost-effective, gas-free heating solution with easy installation, smart controls, and a sleek design that reduces gas usage and fits seamlessly into any space.

The innovative adaptive control system constantly monitors the unit output to maintain the required room temperature, ensuring efficient energy use and a **reduced carbon footprint**.

Compatible
with a 3 phase
electrical
supply

Features & Benefits

- ✓ Instant heat at start-up and simple to service and maintain
- ✓ Manage up to 16 units from a single controller
- ✓ EC fan with 2 pre-programmed speeds
- ✓ Light weight and compact (under 25kg)
- ✓ Suitable for 380/400/415V electrical supplies.

Applications

- Retail outlets
- Schools
- Sports facilities
- Manufacturing
- Transport terminals

R32

LIRA AIR-TO-AIR HEAT PUMP

The LIRA range of air-to-air heat pumps is the ideal choice to transition your industrial building to a gas-free heating and cooling solution.

Be it a warehouse, a manufacturing facility, or a showroom, LIRA provides year-round comfort focused on sustainability and efficiency.

Features & Benefits

- ✓ Heating mode with a maximum output of 50 kW and a COP of 4.38.
- ✓ Cooling mode with a maximum output of 42 kW and an EER of 4.00
- ✓ Less refrigerant needed, zero ozone depletion
- ✓ Highest energy efficiency - quiet operation

Applications

- Office Buildings
- Industrial & Warehousing

DESTRATIFICATION FANS

Reznor destratification fans are a fantastic solution to gain heating efficiency and energy cost savings.

Destratification fans reverse the natural convection process, re-circulating warm air back to working level providing a permanent reduction in roof space temperature and uniform temperature distribution.

Features & Benefits

- ✓ Reduced fuel bills, by eliminating heat build up in roof spaces
- ✓ Heat reclaim from lighting and machinery
- ✓ Reduces pre-heat time
- ✓ Supplied ready for automatic operation with installation only requiring mounting and connection to a single phase electrical supply.

Applications

- Sports facilities
- Industrial & Warehousing

ELECTRIC RADIANT PLAQUE HEATERS

The efficient range of electric radiant heaters provide instant high frequency infrared heat, which is focused exactly where required.

Our electric radiant heaters incorporate the latest shortwave heating technology, giving energy efficient ways to heat people indoors or outside when it truly matters most.

Features & Benefits

- ✓ Reduces the cost of heating large spaces by focusing heat only on relevant areas
- ✓ Quickly heats the area with even heat distribution
- ✓ Can be grouped together either horizontally or vertically to best suit the space
- ✓ A range to cover all kinds of applications - a heating solution for all.

Applications

- Industrial & Warehousing
- Retail

Euro T+

HEATING VENTILATION & COOLING UNIT

The Euro T+ is back and re-engineered with advanced features for superior heating, ventilation and optional cooling with seven output ratings ranging from 30kW to 200kW.

The EuroT+ 2025 Air Handling Unit has a versatile design for diverse applications and seamlessly integrates into both retrofit and new system installations.

Plug fan
with integral
EC control

Features & Benefits

- ✓ Advanced 4-pass heat exchanger tech
- Single burner with multi-try ignition providing reliability
- ✓ Stainless steel heat exchangers to suit application
- ✓ Condensing thermal efficiencies 109% (ncv)

Applications

- Agriculture/Horticulture
- Industrial and Warehousing
- Sports Hall Facilities
- Kitchen
- Exhibition
- Retail
