LOWER COSTS AND HIT YOUR OPERATIONAL TARGETS

Integrate Reznor in your journey by retrofitting your current system with new high tech heating equipment, where you can reduce CO₂ emissions and gain energy savings every year.

ENQUIRY

LOOKING FOR ENERGY AND COST SAVINGS?

Start your HVAC journey through our website, email or phone for a solution to support your needs.

SITE SURVEY

NOT SURE WHAT YOUR HEATING REQUIRES?

Our experienced team will attend your site to review your current heating setup.

DESIGN & QUOTE

WHAT IS THE COST AND HOW WILL IT LOOK?

Our design and quote service can supply you with bespoke drawings. Costs and pay back period to cover ROI.

ORDER

WANT FAST QUOTE TURNAROUND?

Utilise our handy online quotes to basket tool, where the ordering process is seamless with a vast range of HVAC stock to choose from.

INSTALLATION

WHO WILL BE THE CONTRACTOR?

Installation manuals are given and readily available online to help your contractor of choice.

COMMISSION

WHO WILL GIVE ME THE STAMP OF APPROVAL?

Our experienced engineering team will attend site and ensure your heaters are installed and running as it should.

ONGOING SUPPORT

WHO CAN I SPEAK TO DURING THE PROCESS?

You can speak with our dedicated key account managers, customer service team or visit our digital tools for technical support.

AFTERCARE

WHAT IF I NEED EXTRA SUPPORT?

Our customer service is second to none. With 2 years warranty on your products for comfort all year round and a range of spares available for next day delivery.

ELEVATE PRODUCTIVITY

Create optimal working environments that keep employees comfortable and increases footfall

It's vital within a commercial working environment that your employees and customers are comfortable.

By choosing Reznor as your HVAC partner, you can maintain optimal temperatures: which can promote longer customer stays, prevent product deterioration and improve employee satisfaction.

Enhance your own productivity, by utilising our self-serve digital tools:

Maintaining a temperature between

18°C

-

22°C

promotes a comfortable retail environment

HIGH EFFICIENCY WHILST SAVING ENERGY COSTS

Reduce heat waste whilst keeping your retail facilities comfortable

Ensuring your heating runs at peak efficiency is essential for your business. By choosing Reznor as your HVAC partner, you gain cost savings, productivity, and sustainability. Our experienced engineers and bespoke design process ensure optimal performance year-round.

Upgrading your heating systems ensures long-term cost savings and comfort. Our warm air and radiant heating systems offer cost-effective, efficient solutions for large commercial spaces.

REDUCE HEAT WASTE

through frequently open doors with Guardian Air Curtains

DF / IDF SERIES

**GAS FIRED
COMBINED
HEATING AND
VENTILATION**

One of the UK's leading specialists in the design and manufacture of gas fired heating equipment.

The comprehensive range of gas fired air heaters provides high efficiency combined heating and ventilation solutions across a broad spectrum of industrial and commercial applications. Combined heating and ventilation units ensure precise control, excellent indoor air quality and optimum energy efficiency.

System Types

The units are designed to provide the primary heat source across a wide range of applications including:

- Ductless air distribution
- Air Induction systems
- Tempered input ventilation
- Industrial make up air
- Industrial air displacement ventilation
- Pressure ventilation systems

Download
the product
guide

Features & Benefits:

- ✓ Reduced running costs
- ✓ Low installation costs
- ✓ Even heat distribution
- ✓ Rapid warm up
- ✓ Improved air quality
- ✓ Ventilation at no extra cost

DF SERIES

**GAS FIRED
MAKE-UP
FOR KITCHEN
VENTILATION**

To meet the requirements of BS 6173 and DW 172 it is essential to supply tempered replacement air to commercial kitchen areas.

The Nordair Niche DF range provides an economical solution with low running costs and low ongoing maintenance costs.

A comprehensive range of units is available to suit a wide range of commercial applications including restaurants, care homes and school kitchens.

Variable Air Volume

The VAV variable air volume units incorporate an inverter drive and a high efficiency Nordair Niche box burner with integral combustion air fans to maintain optimum performance as the air flow varies.

For installations already incorporating supply air fans, burner modules can be supplied without a fan section to provide tempered air input.

Features & Benefits:

- ✓ Airflows from 0.56m3/s to 5m3/s
- ✓ Units fully weatherproofed
- ✓ Net thermal efficiency of 100%
- ✓ Precise temperature control
- ✓ Optional variable air volume supply
- ✓ Three phase and single phase units available
- ✓ Simple installation
- ✓ Reduced running costs
- ✓ CE approved units

RHC+

HIGH EFFICIENCY ULTRA LOW NOX HEAT MODULE

RHC+ is the latest generation fully packaged heating module designed for inclusion in air handling units to provide a condensing high efficiency ultra low NOx gas fired heating section.

Ideally suitable for replacing steam and hot water coils in existing units, enabling the changeover from central boiler plant to be decentralised gas fired systems.

The units also provide an ideal heating module for installation in ductwork systems and a variety of industrial applications including drying and curing.

Simple Easy Installation

The heating modules are designed for fast and simple installation and only require "coil slides" for incorporation within an Air handling Unit.

Features & Benefits:

Non-condensing options available

Duct on-off solution

Flexible options for installations

Air handling unit heat module

REZNOR® EURO T+

Gas Fired Heating Ventilation & Cooling Units

Available with a total of seven output ratings from 30kW up to 200kW for internal or external mounting for operation on gas, LPHW or electric.

Incorporating high efficiency, low NOX pre-mix modulating burners, and EC plug fans as standard ensures high efficiency and minimum energy consumption is achieved.

Features & Benefits:

- ✓ Advanced 4-pass heat exchanger technology
- ✓ Single burner with multi-try ignition providing reliability
- ✓ Stainless steel heat exchangers to suit application
- ✓ Modulating burner fitted as standard
- ✓ Plug fan with integral EC control
- ✓ Internal, External and Roof top versions

Applications:

Car Show Rooms Supermarkets

Workshops Factories Schools

OUR OTHER PRODUCTS

WARM AIR HEATING

RHECO LOW NO_x CONDENSING HEATERS

our suspended gas-fired unit heaters are an economical choice and can repay the extra initial cost in fuel savings in 2-4 years depending on usage.

- ✓ Substantially reduced CO₂ and NO_x emissions
- ✓ Burner with new "pull through" combustion technology
- ✓ Powerful air throw for improved heat distribution

DESTRAT FANS

DESTRATIFICATION FANS

re-circulate warm air back to working level providing a permanent reduction in roof space temperature and uniform temperature distribution.

- ✓ Reduces pre-heat time and improved comfort level
- ✓ Complements traditional heating systems
- ✓ Reduced fuel bills, by eliminating heat build up in roof spaces

FLOOR STANDING HEATING

COMET+ HIGH EFFICIENCY CABINET HEATERS

incorporating the latest generation of heat exchanger technology to become an industry benchmark for design and performance.

- ✓ High efficiency condensing versions available
- ✓ Combustion efficiencies of up to 94%
- ✓ External weather-proof casing models available

RADIANT HEATING

VISION RADIANT TUBE HEATING SYSTEM

focuses heat on specific areas directly beneath, avoiding energy wasted by heating areas such as unoccupied areas and warehouse storage.

- ✓ Straight-forward annual maintenance
- ✓ Particular ranges can be mounted in linear or U tube herringbone configurations
- ✓ Fuel savings of up to 75%

AIR CURTAINS

GUARDIAN AIR CURTAINS

deliver a powerful barrier of heated air across open doorways and stop indoor heat escaping, to create a more cost efficient and comfortable indoor environment.

- ✓ Can be wall mounted or suspended in front of entrances
- ✓ Allows doors to be left open for constant access
- ✓ Lower energy bills; minimising the loss of warm air

RADIANT HEATING

NOR-RAY-VAC RADIANT TUBE SYSTEM

designed to provide uniform heat coverage or alternatively cater for distinct zones, providing a varied degree of comfort level within the overall layout of the building.

- ✓ Rapid heat-up times with low noise level
- ✓ Widest range of burner inputs for any continuous system
- ✓ Savings of up to 60% being achieved over conventional heating systems
